

SHOCK®

Injury, Inflammation, and Sepsis: Laboratory and Clinical Approaches

OFFICIAL JOURNAL OF THE SHOCK SOCIETY, THE EUROPEAN SHOCK SOCIETY, THE INDONESIAN SHOCK SOCIETY, THE INTERNATIONAL FEDERATION OF SHOCK SOCIETIES, AND THE OFFICIAL AND INTERNATIONAL JOURNAL OF THE JAPAN SHOCK SOCIETY

Volume 37, No. 2

February 2012

		<i>Commentary</i>
Lorrie A. Langdale	127	What's New in <i>Shock</i>, February 2012?
<hr/>		
		<i>Clinical Aspects</i>
Heiko Trentzsch, Stefan Huber-Wagner, Frank Hildebrand, Karl-Georg Kanz, Eugen Faist, Stefan Piltz, Rolf Lefering, and TraumaRegistry DGU	131	Hypothermia for Prediction of Death in Severely Injured Blunt Trauma Patients
Helmut Trimmel, Ursula Luschin, Karin Köhrer, Christian Anzur, Daniela Vevera, and Andreas Spittler	140	Clinical Outcome of Critically Ill Patients Cannot Be Defined by Cutoff Values of Monocyte Human Leukocyte Antigen-DR Expression
Tjaakje Visser, Janesh Pillay, Peter Pickkers, Luke P. H. Leenen, and Leo Koenderman	145	Homology in Systemic Neutrophil Response Induced by Human Experimental Endotoxemia and by Trauma
Huai-Wu He, Da-Wei Liu, Yun Long, Xiao-Ting Wang, Wen-Zhao Chai, and Xiang Zhou	152	The Transcutaneous Oxygen Challenge Test: A Noninvasive Method for Detecting Low Cardiac Output in Septic Patients
Jens Heyn, Carola Ledderose, Ludwig C. Hinske, Elisabeth Limbeck, Patrick Möhnle, Holger A. Lindner, and Simone Kreth	156	Adenosine A_{2A} Receptor Upregulation in Human PMNs is Controlled by miRNA-214, miRNA-15, and miRNA-16
<hr/>		
		<i>Basic Science Aspects</i>
Stephen W. Standage, Charles C. Caldwell, Basilia Zingarelli, and Hector R. Wong	164	Reduced Peroxisome Proliferator-Activated Receptor α Expression is Associated with Decreased Survival and Increased Tissue Bacterial Load in Sepsis
Marc O. Maybauer, Dirk M. Maybauer, John F. Fraser, Martin Westphal, Csaba Szabó, Robert A. Cox, Hal K. Hawkins, Lillian D. Traber, and Daniel L. Traber	170	Combined Recombinant Human Activated Protein C and Ceftazidime Prevent the Onset of Acute Respiratory Distress Syndrome in Severe Sepsis
Shuichi Hiraki, Satoshi Ono, Manabu Kinoshita, Hironori Tsujimoto, Risa Takahata, Hiromi Miyazaki, Daizoh Saitoh, Shuji Seki, and Kazuo Hase	177	Neutralization Of Il-10 Restores the Downregulation of Il-18 Receptor on Natural Killer Cells and Interferon-γ Production in Septic Mice, Thus Leading to an Improved Survival
Fu Sheng Lin, Shi Qiang Shen, Zu Bing Chen, and Rui Chen Yan	183	17β-Estradiol Attenuates Reduced-Size Hepatic Ischemia/Reperfusion Injury by Inhibition Apoptosis Via Mitochondrial Pathway in Rats
Sadaf Sultan, Matteo Pascucci, Shakil Ahmad, Ihtaz Ahmad Malik, Alberto Bianchi, Pierluigi Ramadori, Ghayyor Ahmad, and Giuliano Ramadori	191	Lipocalin-2 is a Major Acute-Phase Protein in a Rat and Mouse Model of Sterile Abscess
Daniel H. Seitz, Janine S. Fröba, Ulrike Niesler, Annette Palmer, Heinrich A. Veltkamp, Sonja T. Braumüller, Florian Wagner, Katja Wagner, Stefan Bäder, Ulrich Wachter, Enrico Calzia, Peter Radermacher, Markus S. Huber-Lang, Shaoxia Zhou, Florian Gebhard, and Markus W. Knöferl	197	Inhaled Hydrogen Sulfide Induces Suspended Animation, But Does Not Alter the Inflammatory Response After Blunt Chest Trauma

Instructions for Authors are available online at http://journals.lww.com/shockjournal/Documents/SHOCK_IFA.pdf and will be printed in the January and June issues of the journal.

COVER: Effect of 17 β -estradiol on hepatic histology after reduced-size hepatic ischemia/reperfusion (I/R) injury. Hepatic tissue histology changes were processed with H&E staining at 12 h after reperfusion in sham, 1/R and E2 + 1/R group (HE \times 400). Photograph depicted typical pattern of necrosis (black arrows around the venous area).
