

# Shock Society/Novo Nordisk Research Grant Hemorrhagic Shock and Hemostasis For Early Career Investigators 2008

## GOALS

This scholarship seeks to provide a platform for the continued development of scholarship in the areas of hemorrhagic shock, resuscitation and hemostasis.

## OBJECTIVE

To create opportunities for early career research investigators (MDs, PhDs or equivalent) to develop independent research programs in the areas of hemorrhagic shock and hemostasis. The specific intent is to provide support for young scientists pursuing an interest in the area of hemorrhagic shock through basic and/or clinical research. Preference will be given to investigators with less than 5 years of post-graduate experience. The selected researchers can be supported at their home institutions or at collaborating institutions. If relevant, collaboration through a "visiting scientist program" at the Novo Nordisk research laboratories in North Brunswick, NJ, USA could also be possible.

## FOCUS

Proposals should center on hemorrhagic shock and the effects of hemorrhage and hemostasis upon the organism. Approaches may vary from basic cellular responses to outcomes research, and may include translational science as well as clinical applications. Preference will be given for new and innovative research not generally supported by industry.

## FELLOWSHIP

One fellowship will be awarded annually, with a duration of two years. One candidate will be selected through the US Shock Society. Candidates must apply through the US SS. Candidates from all over the world are encouraged to apply. Although not a selection criterion, the Shock Societies appreciate new membership applications.

## START

Award will be presented at the Annual Meeting of the Shock Society, June 28-July 2nd, 2008 in Cologne, Germany. Grant winner will be notified in advance of the meeting.

## AMOUNT

US\$ 60.000 per award, distributed over the 2 year duration of the grant.

## APPLICATION FORMS

Application forms can be downloaded from the Shock Society's website:

[www.shocksocieties.org](http://www.shocksocieties.org)

Winners are expected to provide an annual progress report, an annual research update presentation and a final research presentation at the Shock Society. Further requirements are specified in the application forms.

## DEADLINE

Deadlines for submission of research proposals: April 8, 2008.

### FOR FURTHER DETAILS CONCERNING SUBMISSION CONTACT:

#### U.S. Shock Society

Paul Wischmeyer M.D.

Associate-Chairman for Clinical and Translational Research

Associate Professor of Anesthesiology

Department of Anesthesiology

Leprino Office Building (LOB)
